

BLACK, WOOL SERGE DRAPES [BWS]

From our stock of black, premier wool serge, modular drapes, we are often called upon to:

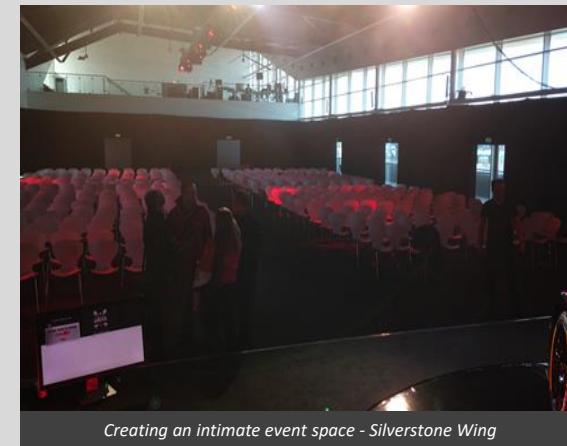

- Reduce-down the size of an event space
- Create 'black box' event spaces
- Subdivide event spaces into smaller areas – forming breakout rooms, etc.
- Provide neutral borders around stage sets or products to enhance impact
- Soften the acoustics of a venue
- Hide venue areas and features
- Create corridors

Pre-Dinner drinks area created in the Broadway Suite - Chateau Impney Hotel

Drape room divide in the Monarch Suite - Hilton Birmingham Metropole

Creating an intimate event space - Silverstone Wing

CAN WE ALSO HELP YOU WITH...

- **Plans:** Create job specific layout plans
- **Ground Support:** Telescopic, pipe & weighted base system or aluminium barrel and Key Clamp fittings
- **Rigging:** Either trussing or aluminium barrel and appropriate fittings
- **Hoists:** Manual chain hoists
- **Door frames:** For creating openings through the drapes
- **Fire Exit Signs:** [LED] to maintain venue fire routes
- **Ground Tubes:** Serge covered tubes that safely and tidily contain any surplus drape.
- **Star Cloths** [LED] to work with the drapes

STOCK SIZES

AVAILABLE FOR DRY HIRE AND FULL-SERVICE HIRE (WE'LL INSTALL AND REMOVE)
ALL DRAPES ARE MODULAR AND CAN BE HUNG, EITHER LANDSCAPE OR PORTRAIT WITH CONNECTING VELCRO SEAMS

9_M X 6_M

6_M X 3_M

6_M X 1.5_M

3_M X 3_M

2_M X 4_M
For use with Door Frame Portals

3_M X 1.5_M

HANGING OPTIONS:

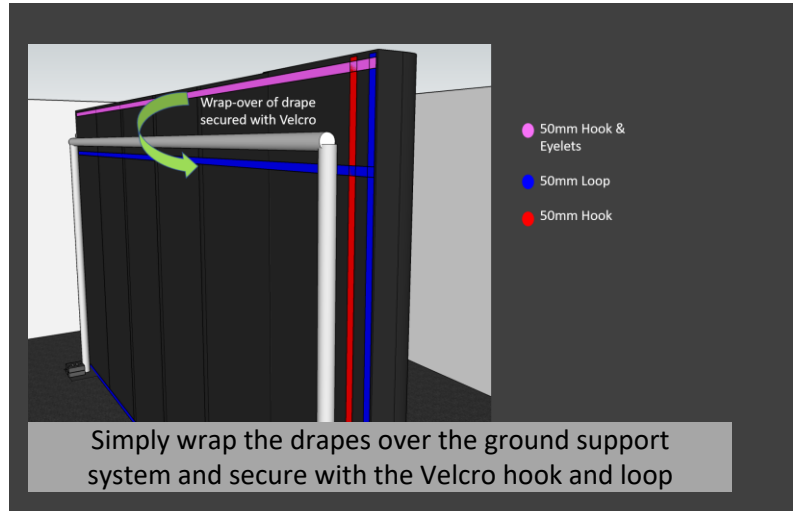

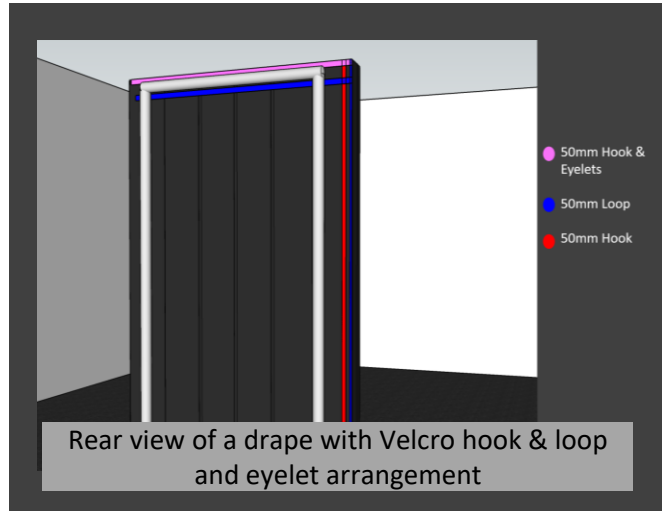

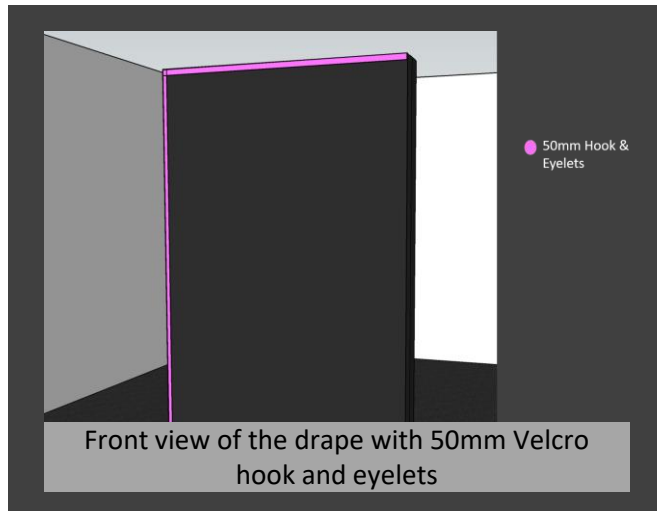

All drapes can be secured to the choice of rigging using *Wrap-Over, spring clamps, theatre ties or cable ties through eyelets.

**Wrap Over is a recent modification to our drapes. It allows the installer to simply wrap the drape over the chosen support and secure in place using the sewn in Velcro fixings. It is both quick and provides a very tidy finish especially on ground supports.*

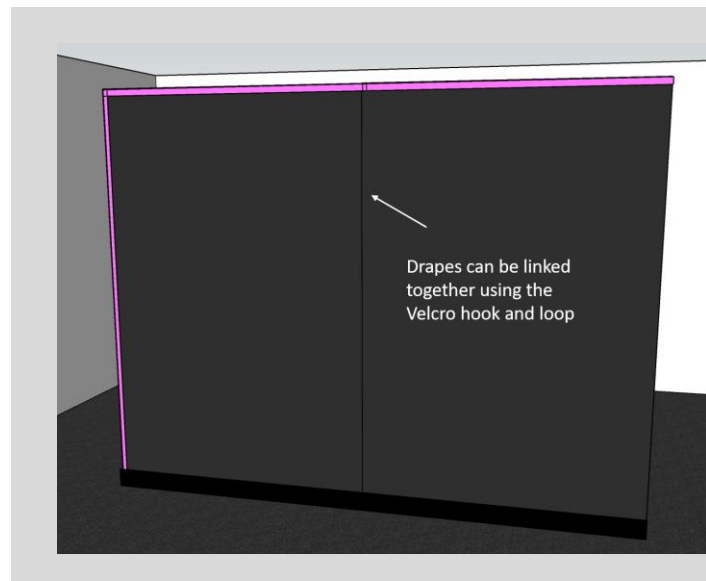

USING WRAP OVER

OTHER DRAPE FIXING METHODS

- **Black Drape Ties** - traditional theatre ties can be added through the eyelets for tying the drapes to either ground supports or rigging.
- **Spring Clips** - can secure the drape to either ground supports or rigging.
- **Eyelets** within the cloths along a top and side [see above cerise coloured lines] of the drape to allow alternative fixings such as heavy duty cable ties

LINKING DRAPES

All drapes, irrespective of size can be linked together horizontally or vertically using the Velcro hook and loop arrangement. This means that any width or drop of drape can be easily achieved.

Wrap over is additional to the drop and width dimensions and therefore the drape dimensions remain as per page 1.

Our header drapes are compatible with our free-standing door frame portals.
